

Ravenscrag Slip is user-friendly

It is simple to use, consistent, it will give you trouble-free production. Glazes apply, dry, fire and wear better.

Ravenscrag Slip is supported

<http://ravenscrag.com> provides full support and personal help.

Where can you buy Ravenscrag Slip? How much is it?

Ask your retailer or visit <http://ravenscrag.com> and click “Where to Buy” on the home page. Making glazes using this material will be dramatically less expensive than buying prepared glazes.

Make your own stoneware glazes using
Ravenscrag Slip

There is no other glaze material like this!

PLAINSMAN Clays Limited

These glazes contain 90%+ of Alberta and Ravenscrag Slips (the recipes are on their sites)

Glorious Glazes Made Using Ravenscrag Slip

Imagine making your cone 10R glazes using 90%+ of just one material and adding colorants, opacifiers, variegators, glossers or matters! Using Ravenscrag Slip you can do exactly this! **Ravenscrag Slip is a conditioned natural combination of clays, fluxes and quartz.** It is mined by Plainsman Clays in North America's premier “Clay Country” (near Ravenscrag, Saskatchewan, Canada).

Stunning GR6-A transparent inside a buff stoneware mug at cone 6 (outside is GA6-C Alberta Slip blue)

Does it work at cone 6?

Yes, just add 20% frit to make it melt and all the magic starts.
