**Celebrating Masters of Ceramic Craft**

**ABOUT US**

**Handmade by husband and wife team in Swift Current Saskatchewan. We love making useful and beautiful pottery for everyday use.**

Most days you can find us in our home studio, covered in mud and listening to worship music. The process of pottery has been very healing for me (Kim). I have always loved to create, through painting, cards, sewing, scrapbooking, just about anything creative. The medium of clay has far surpassed all other mediums, the fact that you can take clay from Saskatchewan land and make a beautiful functional piece of art, is beyond amazing to me. I also love how the Lord shows me His heart through the process; I have learned a great many things at the wheel.

Todd has also been working with clay as a hobby since 2014. In the fall of 2022, Todd made the leap to do pottery full-time. Working together has been a joy for both of us!

Todd uses the slab roller to make pieces. Kim does most of her pieces on the pottery wheel! We make some of our glazes in our studio, we also buy some commercial glazes! Our pottery is fired in an electric kiln to cone 5/6.

**Place:** Swift Current, SK
