Celebrating Masters of Ceramic Craft

I want to produce functional wares with a sense of design and occasional wonder. I am pleased when people wonder about a piece and then smile once they learn its purpose. I want people to enjoy using my work and have a sense of pleasure when they feel it in hand and touch it to lip.

There have been many hobbies, passions, and obsessions that have come and gone during my lifetime, but the clay has always been, and I hope will continue to be, a common thread.

Inspiration comes from so many different sources but mainly from nature. I am also inspired by a love of cooking, friends, family and customers who come to me with their ideas. Also, I have a passion for gardening, bike riding, hiking in the alpine, and spending time in the backyard."

Place: Quesnel, BC
